

TECHNICAL DATA

10k Diesel Particulate Filter Cleaner

PRODUCT DESCRIPTION

10K Boost Diesel Particulate Filter Cleaner is an organo metallic diesel fuel additive that ensures complete & rapid regeneration of the diesel particulate filter. 10K
Boost DPF Cleaner lowers the ignition temperature of soot collected in the diesel particulate filter and optimizes periodic combustion of accumulated soot, a process known as filter regeneration. Diesel Particulate Filter Cleaner also reduces particulate emissions and extends lifetime of particulate filter.

PRODUCT BENEFITS

- * Ensures complete and rapid diesel particulate filter regeneration
- * Reduces ignition temperature of trapped soot ensuring extraordinary combustion at temperatures typically encountered during normal engine operation
- * Prevents performance loss caused by clogged diesel particulate filters and incomplete combustion of soot
- * Reduces particulate emission assisting in meeting strict legislation and emission limits
- * Extends lifetime of the expensive diesel particulate filter
- * Most economic way of soot reduction without any changes to the fuel system
- * Regeneration of diesel particulate filters is 5-10 times faster and more complete than when using a catalyst coated diesel particulate filter.
- * No secondary emissions.
- * Can be used for all diesel engines with standard or retrofitted diesel particulate filter
